OK – you have a successful student! I print-screen-captured with ease! A+

Attached is the PPT as I have it , It's done for now. The slides are not self explanatory so the discussion will have to fill in the messages.

I am using the Bay Barometer as the counter point of not so good Incremental Progress measure. Hope to protect the innocent!

Jon

Jon – my computer doesn't like that file – I can't open it.

All you need to do is open up what you want to copy and hit Print Screen. Then go to the powerpoint slide and hit paste (or ctrl-V). After that, just crop out anything you don't want in there. (Click on the image, then at the top of the screen in powerpoint, go to Picture Tools → Format → Crop. Slide the black tabs in to crop the image, then click away from the image to get back to the slide.)

Sorry I can't get this one in there!

Any thoughts on the performance bullets for Sharon Vasquez in OW? Want to be sure I get those out of our hands today. Thanks!

Thanks Jennie. I will save this file after reordering a couple of slides.

One more assist needed. The Bay Barometer slide is at [http://www.chesapeakebay.net/documents/2014\\_Bay\\_Barometer\\_02.03.2015.pdf](http://www.chesapeakebay.net/documents/2014_Bay_Barometer_02.03.2015.pdf)

I am trying to capture the WQ indicator at top.

If you teach me how to capture the chart for cut and paste to PPT slide, I promise not to bother you again.! (ha)

Jon – I got all of the DRBC slides you asked for in there. Some more elegantly than others, but it looks good. I don't have a bay barometer slide. Will you handle that one? Or is there a graph you'd like me to pull out?

Ok – will try to work down the list.

Could I ask for your PPT help. I will be probably about a dozen or so slides to highlight 4 examples of incremental progress stories.

Attached is my slide set (CAPACASA file) with some placeholder slides. I am trying to incorporate a few slides from the Tom Fikslin presentation attached which unfortunately are in pdf format. Slides 1,8-15, 17 and 20.

And still need to add a Slide on Bay Barometer Water Quality indicator.

That's it.

Lori's slides can be appended to this with a subtitle slide to introduce and I will hand off to her after some discussion.

Thanks

Thanks, Jon! How did you know I had a list? Here are the items, in priority order:

- **Incremental progress** – you should touch base with Lori to discuss how you want to merge your slides/talking points with the CWSRF environmental benefits topic (she was looking for clarification)
- **Performance slide bullets** – see my message from yesterday 1:51 pm – any comments?
- **Water Sustains Us session** - any comments on that session/opening day 2 (see my message this morning to Dom & Lori, cc to you)
- **All-hands session save-the-date** (message from me yesterday afternoon): we should send that whenever you think it's appropriate. I think there were a few weeks' notice for the Cynthia Giles all-hands, but I'll leave the decision to you

- **Performance discussion:** I took a look at how the regional “rankings” might change with 5% and 10% “incentives” for more ambitious commitments. (Basically a multiplier of 1.05 or 1.1 for regions with ambitiousness above the regional average.) Also ran the numbers with and without a “penalty” (0.95 and 0.9 multipliers) for less ambitious commitments. Here’s how it came out. Not sure if you want to use this or not. If you do, there are a couple of different ways to graph it. Just let me know.

| ranking from OW -<br>based on “%<br>commitments<br>met” alone | 5% “incentive”<br>(1.05 and 0.95<br>multipliers) | 5%, no “penalty”<br>(only 1.05<br>multiplier for<br>more ambitious<br>regions) | 10% “incentive”<br>(0.9 and 1.1<br>multipliers) | 10%, no “penalty”<br>(only 1.1 multiplier<br>for more ambitious<br>regions) |                          |
|---|--|--|---|---|--------------------------|
| 1   | 5  | 5  | 5   | 5   | 5 highest ranking region |
| 4   | 2  | 1  | 2   | 2   | 2                        |
| 5   | 1  | 4  | 3   | 1   | 1                        |
| 2   | 6  | 2  | 6   | 4   | 4                        |
| 6   | 4  | 6  | 9   | 3   | 3                        |
| 9   | 9  | 9  | 8   | 6   | 6                        |
| 7   | 3  | 7  | 1   | 9   | 9                        |
| 8   | 8  | 3  | 4   | 7   | 7                        |
| 3   | 7  | 8  | 7   | 8   | 8                        |
| 10  | 10   | 10   | 10  | 10  | 10 lowest ranking region |

I am going to work on the PPT slides for Incremental Progress discussion.

Anything else on your short list that you need my attention to today?
